

Fold Line

Fold Line

Join Pattern Guide

## Join Pattern Guide

Cut out pattern and tape together.  
Cut one of food safe lining, (inside) and one  
of choice patterned cotton for outside.

Sew together with right sides facing (wrong sides out)  
leaving a small gap in seam to turn right side out.  
Press with iron, making sure that the gap has it's hem ironed  
inside. Fold on fold lines and press. Sew together starting at  
fold and all around the curved top ending at the folded edge.

If you want to add extra detail you can use double fold bias tape  
around the edges. Make sure you put the bias tape on the  
flat edge before you sew up the fold. Once the fold is sewn  
then iron the bias tape in the shape of the bag, and sew along  
edge of the bag. See photos for example.

Enjoy!
